WE ARE LOOKING FOR TALENT

IT - Senior Systems Administrator

WE OFFER

- Competitive salary
- Dental insurance
- Savings fund
- Post-grade sponsorship
- Medical insurance (Includes spouse and children)
- Grocery vouchers
- Continuous training

Position Overview

The Senior Systems Administrator is responsible for supporting and modernizing hybrid infrastructure across Microsoft Azure and on-premises environments. This role provides technical leadership for server, virtualization, backup, identity, and data center technologies while supporting manufacturing operations globally. The ideal candidate will have strong experience in Azure, Active Directory/Entra ID, enterprise infrastructure, and manufacturing environments, with the ability to independently solve complex technical challenges and drive infrastructure improvements.

Ideal candidate

Senior Infrastructure Engineer with strong Azure and on-premises expertise, manufacturing environment experience, Active Directory/Entra ID administration, virtualization technologies, and hands-on data center infrastructure management.

Required Qualifications

- **Hybrid Infrastructure (Azure + On-Prem)**
- Active Directory
- Advanced Microsoft Azure, Entra ID (Azure AD), Identity & Access Management experience in multi-regional environments.
- Windows Server Administration
- Experience supporting manufacturing environments
- VMware ESXi administration
- **Nutanix AHV (Acropolis)** experience
- Exchange Online administration
- Veeam and/or Rubrik backup solutions
- Infrastructure documentation and Visio diagrams
- Data Center and rack infrastructure experience
- Experience managing physical data center infrastructure including racks, UPS, cooling systems, power distribution, and documentation
- **Experience supporting IT infrastructure in manufacturing or industrial environments**
- Understanding of **Operational Technology (OT) environment**

Working Conditions

- Hybrid workplace model
- Limited on-call rotation required
- Occasional business travel
- Flexible schedule due to multiple time zones
- Extended periods sitting, standing, and working on a computer
- PPE required when visiting manufacturing or distribution facilities
- Open office environment

Technology Environment

- Azure
- Entra ID (Azure AD)
- Windows Server
- Active Directory
- Exchange Online
- VMware ESXi
- Nutanix AHV
- Veeam
- Rubrik
- Microsoft 365
- Data Centers
- OT/Manufacturing Systems

Highly Desirable

- Experience supporting manufacturing plants
- Nutanix AHV (Acropolis)
- VMware migration projects
- Microsoft Azure certifications
- Rubrik Backup Administration
- Enterprise monitoring platforms (Lansweeper, SolarWinds, PRTG, LogicMonitor)
- Server room and rack infrastructure management
- **Experience working with OT Engineers**

Key Responsibilities

- Design, administer, and support computing environments including hardware, software, applications, and configurations
- Monitor server, hardware, and software performance and resolve issues proactively
- Support deployment of new applications and infrastructure solutions
- Design and maintain backup strategies and disaster recovery solutions
- Troubleshoot hardware, software, network, and system-related issues
- Serve as escalation point for Infrastructure, Help Desk, and Application teams
- Lead infrastructure projects including planning, implementation, and upgrades
- Manage vendor relationships, contracts, and procurement activities
- Create and maintain technical documentation and communications
- Participate in Change Management processes and CAB meetings
- Ensure compliance with operational and security standards
- Administer Active Directory and Microsoft Entra ID (Azure AD)
- Manage Exchange Online, permissions, identity, and access management
- Support manufacturing plant infrastructure and collaborate with OT teams
- Create and maintain infrastructure, rack, and architecture documentation using Visio
- Manage enterprise backup platforms including Veeam and Rubrik
- Support server rooms, racks, PDUs, UPS systems, cooling systems, and physical infrastructure.
