Frontend Developer (Ext JS & JavaScript)

Join a team building dependable software and better digital experiences.

Department	Location	Employment	Level
Engineering	Hybrid	Full-time	Mid-Senior

Position overview
Build polished enterprise web interfaces using Sencha Ext JS and modern JavaScript. You will create reusable components, data-rich screens, and intuitive workflows that connect to backend services and support complex business operations.

Ideal candidate

A frontend specialist who enjoys solving demanding UI problems, understands enterprise application architecture, and cares deeply about usability, performance, maintainability, and visual consistency.

Key responsibilities

- Develop and maintain enterprise applications with Sencha Ext JS.
- Create reusable components, grids, forms, charts, and responsive layouts.
- Integrate frontend applications with REST APIs and real-time services.
- Collaborate with UX, backend, QA, and product stakeholders.
- Improve application performance, accessibility, and browser compatibility.
- Write clear technical documentation and participate in code reviews.
- Diagnose complex UI defects and support production releases.

Required qualifications

- 4+ years of professional JavaScript development experience.
- 2+ years of hands-on experience with Sencha Ext JS.
- Strong knowledge of JavaScript ES6+, HTML5, CSS3, and browser APIs.
- Experience with Ext JS data models, stores, grids, forms, layouts, and component lifecycle.
- Experience consuming REST APIs and handling asynchronous application flows.
- Strong debugging skills using browser developer tools.
- Working knowledge of Git and collaborative development workflows.
- Ability to translate business processes into clear user interfaces.

Desirable qualifications

- Experience with Ext JS Modern and Classic toolkits.

- Knowledge of MVVM, MVC, theming, Sass, and Sencha Cmd.
- Experience with WebSockets, maps, dashboards, or complex data visualization.
- Familiarity with automated frontend testing.
- Experience modernizing or migrating legacy enterprise applications.

What success looks like

- Delivers high-quality work predictably and communicates risks early.
- Improves team practices, documentation, and technical quality over time.
- Builds trusted partnerships across product, engineering, and quality teams.
- Contributes to a respectful, inclusive, and learning-oriented culture.

What we offer

- Hybrid schedule with focused collaboration days.
- Opportunity to build sophisticated, highly visible business applications.
- Training budget and support for Sencha certifications or conferences.
- Paid time off and company holidays.

Hiring process

Recruiter screen, portfolio or project discussion, technical interview, practical Ext JS exercise, and final team interview.

Equal opportunity statement

We value diverse backgrounds and perspectives. Employment decisions are based on business needs, role requirements, and individual qualifications without regard to legally protected characteristics.

How to apply

Submit your resume and a brief note highlighting the experience most relevant to this position. Please include your preferred work location and availability.
