Full Stack Developer (Node.js & React)

Join a team building dependable software and better digital experiences.

Department	Location	Employment	Level
Engineering	Remote	Full-time	Mid-Level

Position overview

Develop complete product features across a Node.js backend and React frontend. You will design APIs, implement responsive interfaces, work with relational data, and participate in the full software-delivery lifecycle.

Ideal candidate

A versatile product engineer who can move confidently between frontend and backend work, make sensible tradeoffs, and collaborate effectively with product managers, designers, and QA engineers.

Key responsibilities

- Build and maintain Node.js and Express services.
- Develop responsive React interfaces and reusable components.
- Design REST APIs and integrate third-party services.
- Create and optimize MySQL schemas and queries.
- Implement authentication, authorization, validation, and error handling.
- Write automated tests and support CI/CD pipelines.
- Participate in estimation, code review, deployment, and production support.

Required qualifications

- 3+ years of full-stack web development experience.
- Strong JavaScript or TypeScript skills.
- Production experience with Node.js and Express.
- Hands-on experience with React, hooks, component architecture, and state management.
- Experience with MySQL or another relational database.
- Understanding of REST API design, JWT authentication, and web security fundamentals.
- Working knowledge of Git, Docker, and automated testing.
- Ability to communicate technical decisions clearly.

Desirable qualifications

- Experience with TypeScript across the full stack.

- Knowledge of Next.js, Vite, or modern React build tooling.
- Experience with WebSockets, queues, caching, or background processing.
- Exposure to AWS, Azure, or Google Cloud.
- Experience with observability, logging, and performance monitoring.

What success looks like

- Delivers high-quality work predictably and communicates risks early.
- Improves team practices, documentation, and technical quality over time.
- Builds trusted partnerships across product, engineering, and quality teams.
- Contributes to a respectful, inclusive, and learning-oriented culture.

What we offer

- Remote-first team and flexible work schedule.
- Broad ownership across product architecture and user experience.
- Professional-development allowance.
- Paid time off and company holidays.

Hiring process

Initial conversation, technical interview, practical full-stack exercise, and final collaboration interview.

Equal opportunity statement

We value diverse backgrounds and perspectives. Employment decisions are based on business needs, role requirements, and individual qualifications without regard to legally protected characteristics.

How to apply

Submit your resume and a brief note highlighting the experience most relevant to this position. Please include your preferred work location and availability.
