Camila Torres

QA Automation Engineer

camila.torres@example.com | 555-200-0016

Querétaro, Mexico | Hybrid | English: Upper-intermediate (B2)

PROFESSIONAL PROFILE

Automation QA engineer with strong hands-on browser testing, API validation and regression strategy. Creates maintainable test suites and integrates quality checks into release pipelines.

TECHNICAL SKILLS

- Selenium WebDriver (Java), Cypress (JavaScript), Playwright
- API testing: Postman, REST Assured, status and contract tests
- Test plans, regression suites, defect triage, exploratory testing
- JMeter performance smoke tests, SQL validation
- GitHub Actions, Jenkins, Jira, Scrum

PROFESSIONAL EXPERIENCE

QA Automation Engineer | Calidad Web (2022–2026)

Built Cypress and Selenium regression suites for an enterprise customer portal, increased automated critical-path coverage from 30% to 82%, and integrated smoke tests into CI.

Software QA Analyst | Optima Digital (2021–2022)

Executed exploratory and API tests, logged actionable defects and maintained acceptance test cases with product teams.

EDUCATION & ADDITIONAL INFORMATION

B.S. Information Systems | Universidad Autónoma de Querétaro (2021)

Experience: 5 years | ISTQB Foundation Level; strong Selenium and Cypress production use.
