# Javier Castillo

## Senior Java Backend Engineer

javier.castillo@example.com | 555-200-0017

Bogotá, Colombia | Remote | English: Advanced (C1)

### PROFESSIONAL PROFILE

Backend Java developer focused on payment systems and distributed messaging. Has substantial unit and integration testing, but no professional Selenium/Cypress ownership or test automation role.

### TECHNICAL SKILLS

- Java 17, Spring Boot, Spring Security, Hibernate
- PostgreSQL, Kafka, REST API and microservices
- Docker, Kubernetes basics, Maven, CI/CD
- JUnit 5, Mockito, integration tests
- Git, OAuth2, backend performance profiling

### PROFESSIONAL EXPERIENCE

**Senior Java Engineer | PagoSeguro (2021–2026)**

Built payment microservices in Spring Boot and Kafka, improved transaction retry reliability and maintained unit/integration tests; collaborated with a separate QA automation team.

**Java Developer | Soluciones Altas (2018–2021)**

Developed API services, persistence layers and authentication modules for banking workflows.

### EDUCATION & ADDITIONAL INFORMATION

B.S. Systems Engineering | Universidad Distrital (2018)

Experience: 8 years | No Selenium, Cypress, Playwright or dedicated QA test framework background.
