Michael Rodriguez

Full Stack Developer

michael.rodriguez@email.com | 555-100-1003 | Chicago, IL

PROFESSIONAL SUMMARY

Product-minded full stack engineer experienced in Node.js, React, APIs, and relational and document databases. Builds secure, maintainable web applications from concept through deployment.

TECHNICAL SKILLS

Node.js	Express	React	MySQL	MongoDB
JWT	Docker	REST APIs	Git	TypeScript

PROFESSIONAL EXPERIENCE

Full Stack Engineer | Cobalt Labs

2021 - Present

- Built React and Node.js features for a subscription management platform.
- Designed secure JWT-based authentication and role-based authorization.
- Containerized services with Docker and improved deployment repeatability.
- Collaborated with design and product teams to ship monthly releases.

Software Developer | MarketBridge

2018 - 2021

- Developed Express APIs, React dashboards, and MySQL reporting workflows.
- Integrated third-party payment, email, and analytics services.
- Reduced support issues by adding validation, logging, and automated tests.

Junior Web Developer | Lakefront Apps

2017 - 2018

- Created responsive interfaces and backend endpoints for small business clients.

EDUCATION

B.S. Software Engineering - Illinois Institute of Technology
