Sarah Kim

DevOps Engineer

sarah.kim@email.com | 555-100-1004 | Seattle, WA

PROFILE

Cloud infrastructure engineer focused on reliable AWS platforms, infrastructure as code, container orchestration, and secure delivery pipelines.

CORE SKILLS

- AWS
- Docker
- Kubernetes
- Terraform
- Linux
- Jenkins
- CloudWatch
- Grafana
- CI/CD
- Python

EDUCATION

B.S. Information Systems - University of Washington

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate
- Certified Kubernetes Administrator

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer

2020 - Present

Nimbus HealthTech

- Designed highly available AWS infrastructure across multiple environments.
- Implemented Terraform modules and Kubernetes deployment standards.
- Reduced deployment time from 45 minutes to under 10 minutes through CI/CD automation.
- Built monitoring and alerting dashboards using CloudWatch and Grafana.

Cloud Engineer

2017 - 2020

RainCity Financial

- Managed Linux servers, Docker workloads, and Jenkins pipelines.
- Automated provisioning and compliance checks using Python and Terraform.
- Participated in incident response and post-incident reviews.

Systems Administrator

2015 - 2017

Evergreen Services

- Supported Linux infrastructure, backups, patching, and access controls.
